### IMPORTANT ANNOUNCEMENT

With ever-increasing postal charges and costs of paper and printing the continued publication of the *Annals* as a monthly journal would have entailed a substantial increase in 1976 in the subscription rates for non-Fellows and in the charge to the College general funds. The Council has therefore reluctantly decided that from January 1976 the *Annals* will be published in alternate months only, each issue containing more pages than the current monthly issue. *The annual subscription rates for non-Fellows will remain unchanged.* As at present, each volume will consist of six issues, so that in future there will be one volume each year instead of two.

The *Annals* will continue to publish Hunterian and other statutory lectures and also the Hunterian and Lister Orations, the Vicary and Moynihan Lectures, and articles by Fellows and Members on 'Aspects of diagnosis and treatment'. The *Annals* will increasingly communicate College policy on undergraduate and postgraduate education and the training of surgeons, dental surgeons, and anaesthetists, and will report the teaching and research activities of the Institute of Basic Medical Sciences and other College research.
